

## You Should Consider Accordion Shutters if . . .

- **Your structure is concrete, masonry, or frame construction with smooth exterior finish**
- **You have a curve area needing storm protection**
- **Simple slide together operation is needed**
- **Ability to operate and secure from inside if needed. (must be able to open window adequately to affect operation of shutter)**

These one or two piece hurricane shutters are housed beside the windows or doors when not in use. They unfold accordion-style to cover and protect during a storm.

### Customizing Your Shutters

- These shutters are painted using an electrostatically applied, baked-on enamel finish that can be ordered in one of four colors
- We offer factory curved tracks for going around corners or to follow the contours of your walls
- We offer walk-over tracks for doorways

Simple slide together operation with center lock.

## You Should Consider Rolling Shutters if . . .

- You are in the design or construction stage
- You have an existing home
- Your structure is stucco, brick, wood fascia or frame (if smooth exterior surface)
- Ease of operation is important
- Sun and light control is important
- Security is important
- Sound control is important
- Access to opening is difficult, e.g., second story windows

These shutters attach above the window. They roll up and store in an enclosed box when not in use. They are lowered either manually by a hand crank or automatically by push button, and lock in place for storm protection.

- Most popular shutter product
- Easy to install on any existing home
- Easy operation from inside or outside the home
- Provides excellent security
- Most versatile protection product
- Convenient Light control
- Privacy control

Rolling shutters can be operated manually or with a remote controlled motor.
