## Programming Instructions for Liftmaster Remotes & Keyless Entries

**(Also applies to Chamberlain, Craftsman  
and some Raynor openers)**

Click the link below the chart to view the manual and programming instructions. Your remote or keypad model number should be listed on the label on the back of the product. If your product model number is not listed then that model may not be available any longer. Liftmaster offers a universal remote and keyless entry that can be programmed to most brands and models or the new MAX series which will work on any Chamberlain product, including Craftsman, Liftmaster and Raynor, manufactured after 1993.
